## Helping faculty new to FIU achieve research success

By Alexandra Pecharich

The Division of Research (DoR) has the people, resources and knowledge to help faculty new to FIU achieve research success.

That was the message delivered by Vice President for Research Andrés Gil and staff at an informal gathering for incoming research faculty. The thirty recent FIU arrivals who attended—among the 156 new professors that joined the University for the 2014-15 academic year—included experts on cognitive deficiencies of children with ADHD, mosquito genetics, consumer behavior, transportation, and electrical engineering, among other areas.

Associate Vice President for Research Luis P. Salas explained the Division's mission in a nutshell: "Our job is customer service. Our job is to help you with whatever you can't solve."

The core objectives of DoR are to help with funding proposals, manage awards, ensure research integrity and facilitate tech transfer. DoR staff members can assist on the front end with making proposals as strong as possible, Gil said, particularly when researchers contact them early in the process. Once an award is made, the Division can help with administrative-type issues such as smoothing the hiring of personnel and the purchasing of equipment and supplies covered under a grant—acquisitions that individual University academic departments generally have limited knowledge about. The goal, he said, is to handle concerns that might otherwise distract faculty from the priority of conducting research.

Gil also addressed the value of collaboration and talked about eventually creating an online directory of research faculty to help facilitate such work. "The places that are most successful are the ones that do interdisciplinary research," he said. "It's really about team science." Noting that funders increasingly reward interdisciplinary projects, he added that his office is working to establish better and wider understanding about the work of FIU's

research centers and institutes, each of which offers the possibility of bringing together investigators in various departments and schools.

New hires were also introduced to the capabilities of FIU's recently established Integrated Biostatistics Center that provides support for investigators in the areas of data management and data-quality enhancement. And they learned about mentoring and other opportunities. DoR offers workshops for those new to the role of principal investigator—past topics have included how to develop a testable hypothesis and how to get funding from NIH—and Suzanna Rose, representing the university's Faculty Mentor Program, talked about pairing new faculty with veterans to help smooth the road to tenure. (More information about the latter can be found at [mentor.fiu.edu](http://mentor.fiu.edu).) Gil also introduced Maureen Pelham, Director of the Research Development Unit, which has the mission of assisting FIU faculty, research scientists, postdocs and students in their efforts to build strong and competitive programs for research, scholarship and creative activities. The Unit facilitates this effort by helping to identify funding opportunities for research projects, assisting with the development of proposals for external funding, and identifying and leveraging University resources to strengthen research programs and projects.

Nipesh Pradhananga, a new faculty member who specializes in using emerging technology to make construction sites safer for workers, appreciated the overview. "At least [now] I know how to start. It's like I have somebody to rely upon."

Melanie Stollstorff, a cognitive neuroscientist who recently completed a post-doctorate at the University of Colorado at Boulder, attended the research session as well as an earlier daylong introduction to the university at large. "I think the orientation process for new faculty has been excellent," she said. "Faces are actually starting to become familiar, and I feel like I am part of this research community. I feel very welcome."

## Upcoming Events

### September 2014

- **September 16, 17, and 18 (T, W, TH), 3:30-4:45pm, Faculty Mentor Program Orientation Workshops, AHC4 #402 (Sep. 16 & 17) and CEC, EC 3278 (Sep.18),** with a focus on how to benefit from being and having a mentor. This program is aimed primarily at providing tenure-earning assistant professors with a faculty mentor from outside of her/his home department. To the extent possible, we will attempt to provide a mentor or mentoring opportunities for Associate Professors and Instructors. This program serves these colleges: CAS, CEC, RSCPHSW and HWCOW. Faculty from other colleges interested in participating are also welcome to join. If interested, please contact us at [mentor@fiu.edu](mailto:mentor@fiu.edu) or visit <http://mentor.fiu.edu> for the future RSVP link, updates, and information on new and past workshops.

- **November 14, 1-5pm, AHC2 170, NIH/NCBI Hands-on Human Genome Workshop: Human Variation and Disease Genes.** This workshop will focus on resources associated with human sequence variations and phenotypes and emphasizing the central role of the Gene database as the best way to access this data. You will start with the mouse *fig4* gene homolog and the human *APOE* gene as examples to navigate across the integrated databases to find phenotypes, literature, sequences (genome, mRNA and protein), and variations. You will learn how to map those variations onto genes, transcripts, proteins, and genomic regions. You will also gain experience using additional tools and viewers associated with Entrez. These include the Graphical Sequence Viewer, the Map Viewer, the Variation Viewer, Gene View in dbSNP, and the 1000 Genomes Browser. This event will be hosted by Jessica Liberles and Yuk-Ching Tse-Dinh as part of the Biomolecular Sciences Institute (BSI) Lecture Series.
